FOCUS ON THE AUTOMOTIVE AT METEF 2017

The automotive sector is a strategic link in the product chain of METEF 2017. The next edition of the show will in fact devote **special attention to the automotive sector by staging top-level technical initiatives and meetings where excellent companies will present their contribution in terms of innovation and competitiveness.**

The upswing of the Italian automotive market marks a crucial turning point after the long crisis of the last years and it will no doubt affect the entire Italian and European industrial fabric in

a positive way. METEF 2017 will showcase the outstanding technological level of the Italian industry in this sector, which is the crossroads of the demand for innovation and the offer of customized solutions.

SPECIALIZED VISITORS FROM THE AUTOMOTIVE SECTOR

Companies that offer innovative products and services for the automotive industry will benefit from ideal conditions at the next METEF show. These companies will **meet designers, purchasing managers, technicians and R&D directors of**

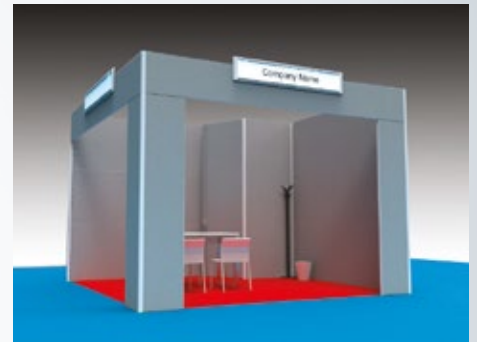

tier 1 suppliers (OEMs), carmakers as well as manufacturers of commercial and industrial vehicles, agricultural and earth-handling machinery, underground and surface trains.

The last edition of METEF confirmed the value of the show on the international arena of the sector expos with over **10,000 operators** - more than **one third** coming from abroad, mainly from **Germany, Turkey, Iran and Eastern European countries**, which are strategic markets searching for high technology and specialization.
